TailwindCSS

RestAPI

Nextjs

--- Projects ---

Alpha Energy

Built a responsive weightloss website that follows up potential clients and maps out various means to achieve a perfect and healthy body system through dieting and exercising.

Arkinvest

Cloned the Ark invest website which is geared towards investment in various sectors such as: cryptocurrency, real-estate, foreign-exchange.

Cyclepay

Built a crypto-based company that's into maximising client profits through various means: stock, real-estate, foreign-exchange etc. A multi-page website built using Nodejs, Express.js, ejs then sass and bootstrap for the styling. Fully responsive on all Mobile and desktop sizes.

Todoapp

Built a to-do-list app with great UI/IX built with Node.js and with dependencies: express, body-parser, ejs, loads, mongoose etc. Capable of adding and deleting items and storing them in a database (MongoDB Atlas). It's also capable of creating multiple custom pages.

React weather app

This project was built with React and it's capable of showing the weather forecast for the whole week.

React password generator

This application is capable of providing unique password and security for users who want a unique and strong password. The user can choose whether he/she wants alphabets, numbers and special characters

TechUni

I built the website which helps our students to register to our lecturing programs, browse through the courses, see faculties and past cohorts.

Techjobber

We intend that students who finish from our courses aren't just left unattended to like some online courses do, but we built an application to help them easily search for jobs, be easily seen by recruiters by being able to upload their past projects.

──── Achievements & Awards ────

I was made a CTO after a month of working with CareerEdu
